Total Marks /1

- 1 A person uses a pivoted lever to lift a boulder of weight W as shown.

The centre of gravity of the boulder is a distance d from the pivot. The angle of the lever to the horizontal is θ .

Which expression is equal to the moment of W about the pivot?

- A. Wd
- B. $Wd \cos \theta$
- C. $Wd \sin \theta$
- D. $Wd \tan \theta$
