Easy Questions

1 Which of the following is an example of a scalar quantity?

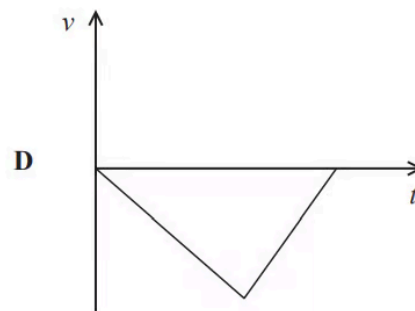

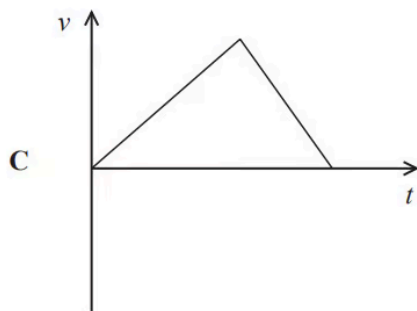

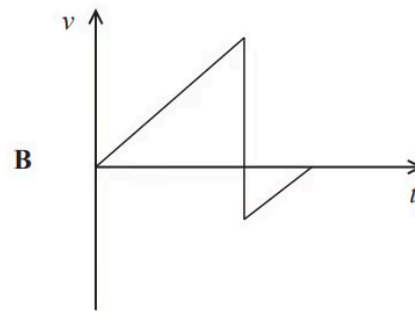

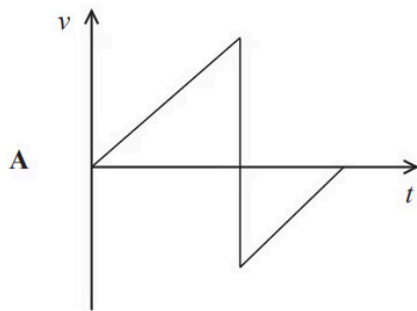

- A. displacement
- B. energy
- C. momentum
- D. velocity

(1 mark)

Medium Questions

- 1 A ball was dropped from rest, from a height above the ground. The ball bounced back up to about half its initial height.

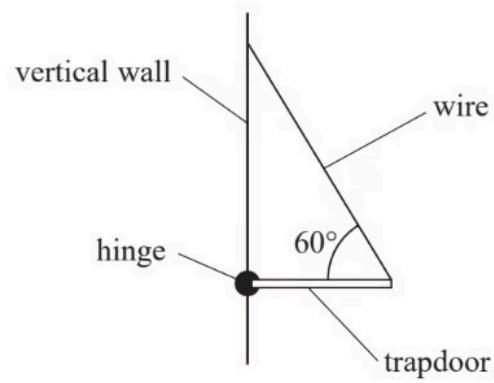

Which graph shows how the velocity v of the ball varied with time t ?

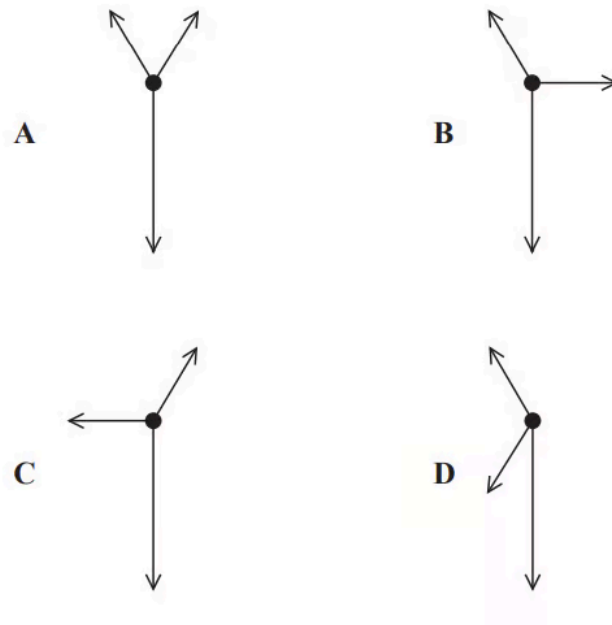

(1 mark)

- 2 A trapdoor is fixed to a vertical wall with a hinge. A wire is attached to the other end of the trapdoor and inclined at an angle of 60° , as shown. The wire holds the trapdoor

horizontal.

Which of the following shows the free-body force diagram for the trapdoor?

(1 mark)
